PROFESSIONAL PROFILE

Full stack software engineer with 3+ years building and improving business applications in C#, ASP.NET Core, React, Razor Pages, and SQL. At MATMAK in Dubai, hold end-to-end technical responsibility across application development, production deployment, servers, databases, infrastructure, integrations, and ongoing support. Start new client projects from architecture and server provisioning through implementation and production launch, while also extending the established MATMAK SaaS. Earlier experience includes Java Spring Boot services, Flutter applications, and computer science instruction.

TECHNICAL SKILLS

Application engineering: C#, ASP.NET Core, Web API, RESTful APIs, Entity Framework Core, LINQ, dependency injection, JWT and OAuth, Swagger and OpenAPI, OOP, SOLID principles, design patterns, Java, Spring Boot, Hibernate, microservices

Frontend and mobile: React, Razor Pages, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, responsive UI, Flutter, Dart, Android, Firebase

Data and delivery: SQL Server, PostgreSQL, MySQL, MongoDB, Firestore, schema design, query optimization, stored procedures, AWS EC2, Linux, Docker, containerized deployments, Nginx, SSL and TLS, GitHub Actions, Jenkins, CI/CD, Git

Integrations and quality: Stripe, Network International, webhooks, xUnit, JUnit, unit and integration testing, Prometheus, Grafana, Loki, Promtail

Additional technologies: PHP, Laravel, Filament, WordPress, WooCommerce, Angular, Jira, Agile, Scrum, SDLC, code review, secure coding

PROFESSIONAL EXPERIENCE

Full Stack Developer

June 2024 - Present

MATMAK | Dubai, UAE

- **End-to-end responsibility:** Operate independently across full-stack development, direct production deployments, production servers and databases, cloud and service accounts, domains and DNS, monitoring, and ongoing support.
- **New client delivery:** Start and deliver new client projects from requirements and architecture through server provisioning, full-stack implementation, integrations, production launch, and operation.
- **Product engineering:** Maintain and extend an established ASP.NET Core SaaS and PPF cutting platform, building REST APIs, Razor Pages, and workflows for authentication, subscriptions, invoicing, pricing, credits, and cutting operations.
- **Solution structure:** Work in a modular .NET solution spanning API, Client, Admin, Models, and Services projects, using Entity Framework Core and SQL-backed application services.
- **Frontend and payments:** Redesigned customer and administration interfaces and integrated Stripe one-time payments, recurring subscriptions, invoicing, and webhook-based status updates.
- **Performance:** Improved affected EF Core and database read and write operations by about 40% through query tuning and schema redesign.
- **Production infrastructure:** Create and configure Linux cloud and VPS servers from purchase through go-live, including operating system setup, SSH access, hardening, firewalls, Nginx reverse proxy, SSL and TLS, application runtimes, and direct production deployment.
- **Cloud and reliability:** Manage AWS EC2, production database access, automated backups, and staging; build GitHub Actions workflows and monitor production services with Prometheus, Grafana, Loki, and Promtail.
- **Delivery ownership:** Work directly with management and clients on requirements, technical decisions, priorities, production launches, troubleshooting, and ongoing support.

Selected client delivery at MATMAK

XSHIELD Production

- **Production launch:** Delivered the public WooCommerce store at xshield-protect.com end to end, including Linux hosting, domain and DNS, Google Workspace, deployment, and operational support.
- **Custom ecommerce development:** Built custom PHP pages and plugins, API integrations, and import and export workflows; configured Stripe and Network International payment gateways for UAE checkout.

HEXIS Training Centre France Staging

- **Platform delivery:** Architected and built a multilingual training application in staging with a Laravel backend, Filament administration, and React public interface.
- **Business workflows:** Implemented course planning, locations, registrations, certifications, transactional email, and the Hex'pert quiz flow with emailed access, automatic submission, scoring, and results.
- **Reviewed AI assisted workflow:** Used Cursor, OpenAI Codex, custom agent skills, and Model Context Protocol tools where useful, while reviewing and validating changes before release.

HEXIS PRECUT LAB and BODYFENCE Production

- **Production integration:** Developed and enhanced a custom WordPress and PHP plugin for bodyfence.net/hpl, integrating pages, forms, vehicle patterns, and car kits with a dedicated MATMAK API through custom shortcodes.
- **Web administration:** Configure domains and subdomains, Google Workspace and professional email, and DNS for production and staging; maintain additional WordPress sites for performance, security, and usability.

EARLIER EXPERIENCE

Mobile Application Developer

April 2024 - June 2024

Freelance | Dubai, UAE

- **Cross platform development:** Developed Android and iOS applications with Flutter and Dart, responsive Material interfaces, and custom navigation flows.
- **Firebase integration:** Integrated Firebase Authentication, Cloud Firestore, Cloud Storage, and push notifications.

Backend Developer Java Spring Boot

September 2023 - April 2024

Tech-Instinct | Bejaia, Algeria

- **Production services:** Maintained an existing Spring Boot production codebase and REST APIs for the RH Partner HR and payroll SaaS without a greenfield rewrite; deployed each microservice in a separate Docker container.
- **Database performance:** Designed schemas and optimized SQL queries, improving affected query performance by 35% and supporting scalability.
- **Testing:** Wrote JUnit unit and integration tests with more than 90% coverage in the tested scope, strengthening release quality.
- **Production support:** Diagnosed and resolved production defects and supported releases.

Part Time Computer Science Instructor

September 2022 - June 2023

Higher School of Computer Science and Technology ESTIN and University Abderrahmane Mira | Bejaia, Algeria

- **Teaching:** Mentored more than 100 students and created practical labs in programming, algorithms and data structures, computer networks, web development, and mobile development.

EDUCATION

Master's Degree in Software Engineering

2020 - 2022

University Abderrahmane Mira | Bejaia, Algeria

- **Thesis:** Built a MERN B2C progressive web ecommerce application with real-time inventory management, payment processing, and a responsive checkout flow.

Bachelor's Degree in Computer Science

2017 - 2020

University Abderrahmane Mira | Bejaia, Algeria

- **Projects:** Built Java inventory management software and desktop C++ and Android Studio game implementations using the Minimax algorithm; participated in the Computer Science Club.

CERTIFICATIONS AND LANGUAGES

Certifications: Java Developer Certificate, January to March 2020; Huawei Certification in Cloud Computing

Languages: Kabyle native; Arabic, English, and French fluent
