## PROFESSIONAL SUMMARY

Full stack software engineer with 3+ years of experience delivering production business applications with C#, ASP.NET Core, Entity Framework Core, SQL, and Razor Pages. At MATMAK in Dubai, I extend an established ASP.NET Core SaaS platform, covering REST APIs, Stripe subscription billing, and customer and admin interfaces, and I own the full delivery chain: architecture, production databases, Linux and AWS servers, domains and DNS, CI/CD, monitoring, and production support. Improved affected database read and write performance by about 40% and lead client projects from requirements to launch. Earlier built Java Spring Boot microservices for an HR and payroll SaaS. Comfortable working directly with management and clients in English, Arabic, and French.

## TECHNICAL SKILLS

| | |
|---|---|
| **Backend** | C#, ASP.NET Core, ASP.NET Web API, RESTful APIs, Entity Framework Core, LINQ, dependency injection, JWT and OAuth, Swagger and OpenAPI, OOP, SOLID, design patterns |
| **Frontend** | React, JavaScript, TypeScript, Razor Pages, HTML5, CSS3, Bootstrap, responsive UI |
| **Databases** | SQL Server, PostgreSQL, MySQL, MongoDB, Firestore; schema design, query optimization, stored procedures |
| **Cloud and DevOps** | AWS EC2, Linux, Docker, Nginx, SSL and TLS, GitHub Actions, Jenkins, CI/CD, Git, Prometheus, Grafana, Loki, Promtail |
| **Payments and testing** | Stripe (subscriptions, invoicing, webhooks), Network International, xUnit, JUnit, unit and integration testing |
| **Also experienced in** | Java, Spring Boot, Hibernate, microservices, PHP, Laravel, Filament, WordPress, WooCommerce, Flutter, Dart, Firebase, Angular |
| **Ways of working** | Agile and Scrum, Jira, code review, secure coding, AI-assisted development (Cursor, OpenAI Codex, MCP) with review and testing before release |

## PROFESSIONAL EXPERIENCE

### Full Stack Developer
**Jun 2024 – Present**

**MATMAK** | *Dubai, UAE*

*Dubai software company building an ASP.NET Core SaaS and PPF (paint protection film) cutting platform, plus web solutions for automotive clients.*

**.NET SaaS platform**

- Extend an established ASP.NET Core SaaS and PPF cutting platform, building REST APIs, Razor Pages, and business workflows for authentication, subscriptions, invoicing, pricing, credits, and cutting operations.
- Work in a modular multi-project .NET solution (API, Client, Admin, Models, Services) using Entity Framework Core, LINQ, and SQL-backed application services.
- Redesigned the customer-facing pages and administration interface from a dated layout into a modern, responsive UI connected to existing application services and data workflows.
- Integrated Stripe one-time payments, recurring subscriptions, invoicing, and webhook-driven payment status updates.
- Improved affected read and write operations by about 40% by tuning EF Core queries and redesigning the database schema to remove redundant tables and costly joins.

**Delivery, infrastructure, and operations**

- Provision and harden Linux cloud and VPS servers from purchase to go-live: SSH access, firewalls, Nginx reverse proxy, SSL and TLS, application runtimes, and deployment of ASP.NET Core APIs and web applications.
- Manage AWS EC2, production databases, automated backups, and separate staging environments; automate builds and deployments with GitHub Actions.
- Built production monitoring with Prometheus, Grafana, Loki, and Promtail, with dashboards and alerts covering servers, APIs, Nginx, and application logs.
- Administer the company's full infrastructure estate: cloud accounts, servers, production databases, domains, DNS, email, and payment services, with responsibility for availability, security, backups, and access control.
- Lead new client projects from requirements and architecture through launch and support, working directly with management and clients on priorities, technical decisions, and troubleshooting.

**Client project: XSHIELD ecommerce** | *WooCommerce, PHP · Production* | **xshield-protect.com**

- Delivered the public store end to end: Linux hosting, domain and DNS, Google Workspace email, deployment, and operational support.
- Built custom PHP pages and plugins, API integrations, and import and export workflows; configured Stripe and Network International payment gateways for UAE checkout.

**Client project: HEXIS Training Centre, France** | *Laravel, Filament, React · Staging*

- Architected and built a multilingual training platform with a Laravel backend, Filament administration, and a React public interface.
- Implemented course planning, locations, registrations, certifications, transactional email, and a quiz flow with emailed access, automatic submission, scoring, and results.

**Client project: HEXIS PRECUT LAB / BODYFENCE** | *WordPress, PHP, REST API · Production* | **bodyfence.net/hpl**

- Developed a custom WordPress plugin that consumes a dedicated MATMAK API through shortcodes to display vehicle patterns and car kits.

### Mobile Application Developer
**Apr 2024 – Jun 2024**

**Freelance** | *Dubai, UAE*

- Developed cross-platform Android and iOS applications with Flutter and Dart, integrating Firebase Authentication, Cloud Firestore, Cloud Storage, and push notifications.

### Backend Developer, Java Spring Boot
**Sep 2023 – Apr 2024**

**Tech-Instinct** | *Bejaia, Algeria*

- Maintained and extended the production Spring Boot REST microservices of the RH Partner HR and payroll SaaS, each deployed in its own Docker container.
- Designed database schemas and optimized SQL queries, improving affected query performance by 35%.
- Wrote JUnit unit and integration tests reaching over 90% coverage in the tested scope, and resolved production defects to support reliable releases.

### Part-Time Computer Science Instructor
**Sep 2022 – Jun 2023**

**ESTIN Higher School of Computer Science and Technology, University Abderrahmane Mira** | *Bejaia, Algeria*

- Taught and mentored 100+ students in programming, algorithms and data structures, networks, web, and mobile development; created practical lab material.

## EDUCATION

### Master's Degree in Software Engineering
**2020 – 2022**

**University Abderrahmane Mira** | *Bejaia, Algeria*

- Thesis: MERN (MongoDB, Express, React, Node.js) progressive web ecommerce application with real-time inventory, payment processing, and a responsive checkout.

### Bachelor's Degree in Computer Science
**2017 – 2020**

**University Abderrahmane Mira** | *Bejaia, Algeria*

- Projects: Java inventory management software; C++ desktop and Android game using the Minimax algorithm.

## CERTIFICATIONS AND LANGUAGES

| | |
|---|---|
| **Certifications** | Java Developer Certificate (2020); Huawei Certification in Cloud Computing |
| **Languages** | English, Arabic, French (fluent); Kabyle (native) |
