PROFESSIONAL SUMMARY

Software Engineer with 3+ years building full-stack business software in C# and ASP.NET Core; earlier Java Spring Boot at Tech-Instinct. I handle delivery as well as code: Linux servers, hosting, DNS, payments, CI/CD, monitoring, and production releases. At MATMAK I work on the ASP.NET Core SaaS with the team and deliver client sites from setup through public launch (including live XSHIELD), modernized the SaaS UI, and improved API/database performance by about 40%. I use Cursor and OpenAI Codex and review and test changes before release.

TECHNICAL SKILLS

Languages: C#, Java, SQL, Dart, PHP, JavaScript, TypeScript

Backend: ASP.NET Core (.NET 6/8), ASP.NET Web API, RESTful APIs, Entity Framework Core, LINQ, Dependency Injection, JWT/OAuth, Swagger/OpenAPI, SOLID principles, design patterns, Spring Boot, Hibernate, microservices, Docker, OOP

Frontend and Mobile: HTML5, CSS3, Bootstrap, Razor Pages, React, Laravel, Filament, Angular, TypeScript, Flutter, Android, WordPress, WooCommerce

Databases: SQL Server, PostgreSQL, MySQL, MongoDB, Firebase Firestore; schema design, query optimization, stored procedures (where applicable)

Cloud and DevOps: AWS EC2, Linux server provisioning and hardening, Docker, containerized deployments, Nginx, SSL/TLS, GitHub Actions, Jenkins, CI/CD, Git

Payments and Observability: Stripe (subscriptions, invoicing, webhooks), Network International; Prometheus, Grafana, Loki, Promtail

Practices: Agile, Scrum, SDLC, Jira, code reviews, secure coding, unit testing (xUnit, JUnit), integration testing

AI-assisted development: Cursor, OpenAI Codex, MCP (Model Context Protocol), custom agent skills

PROFESSIONAL EXPERIENCE

Full Stack Developer | June 2024 – Present

MATMAK | Dubai, United Arab Emirates

- Took ownership of an existing ASP.NET Core SaaS and PPF cutting platform, maintaining production stability while extending APIs, Razor Pages, and business features.
- Structure a modular multi-project .NET solution (API, Client, Admin, Models, Services) for authentication, subscriptions, invoicing, cutting operations, pricing, and credits.
- Redesigned customer-facing pages and the admin CMS from a dated, minimal interface to a modern, professional UI/UX.
- Integrate Stripe for one-time payments, recurring subscriptions, invoicing, and webhook-based status updates.
- Reduce query latency and read/write time by 40% through Entity Framework Core tuning and database schema redesign.
- Work directly with management on platform features, client projects, GitHub, production releases, and day-to-day delivery with the team.
- Ship frontend and backend features with Cursor and OpenAI Codex, reviewing and validating changes before release.

Within this role at MATMAK — DevOps, deployment, and infrastructure

- Provision new Linux cloud and VPS servers from purchase through production go-live: OS setup and configuration, SSH access, security hardening, firewalls, Nginx reverse proxy, SSL/TLS, and application runtime deployment.
- Manage AWS EC2, automated backups, and staging environments; deploy ASP.NET Core APIs and web applications on Linux with Nginx.
- Implement CI/CD with GitHub Actions, and monitor production with Prometheus, Grafana, Loki, and Promtail.

Within this role at MATMAK — Client project: XSHIELD (WooCommerce, production)

- Delivered the live WordPress / WooCommerce store at xshield-protect.com end to end: Linux server provisioning, domain, Google Workspace email, hosting, DNS, custom development, and production go-live.
- Built custom pages, PHP customizations, and API integrations beyond standard WordPress, and developed custom plugins (including import/export) with AI-assisted development.
- Created and configured Stripe and Network International (UAE) payment gateways for secure e-commerce checkout.

Within this role at MATMAK — Client project: HEXIS Training Centre, France (Laravel, Filament, React — staging)

- Architected and built a multilingual training platform in staging: Laravel (PHP) backend, Filament admin CMS, and React.js public frontend; currently ahead of production launch.
- Delivered planning, certifications, locations, registrations, transactional emails, and Hex'pert registration (emailed quiz link, auto-submit, scoring, and results).
- Owned system design and implementation using AI-assisted development with Cursor, OpenAI Codex, custom agent skills, and MCP; reviewed and validated all changes before release.

Within this role at MATMAK — Client project: HEXIS PRECUT LAB / BODYFENCE (WordPress, production)

- Developed and enhanced a custom WordPress PHP plugin for bodyfence.net/hpl (HEXIS PRECUT LAB) integrating with a dedicated MATMAK API instance.
- Extended site pages and forms with custom shortcodes (for example, fetching and displaying vehicle pattern data and car kits from the API).

Within this role at MATMAK — Web infrastructure and IT administration

- Purchase and configure domains and subdomains, set up Google Workspace and professional email, and point DNS to production and staging deployments.
- Maintain additional WordPress sites for performance, security, and usability.

Mobile Application Developer (Flutter) — Freelance | April 2024 – June 2024

Self-Employed | Dubai, United Arab Emirates

- Developed cross-platform Android and iOS applications using Flutter (Dart) with responsive UI and native-like performance.
- Integrated Firebase Authentication, Cloud Firestore, Cloud Storage, and push notifications, and built custom Material Design navigation flows.

Backend Developer — Java Spring Boot | September 2023 – April 2024

Tech-Instinct | Béjaïa, Algeria

- Took ownership of an existing Spring Boot production codebase, maintaining REST APIs and improving reliability without a greenfield rewrite.
- Developed and maintained Spring Boot microservices running in Docker, with each service deployed in its own container.
- Designed database schemas and optimized SQL queries, improving query performance by 35% and supporting greater scalability.
- Wrote unit and integration tests with JUnit, achieving over 90% code coverage and strengthening release quality.
- Diagnosed and resolved production defects, contributing to 99% system stability and reduced downtime.

Part-Time Instructor, Computer Science | September 2022 – June 2023

Higher School of Computer Science and Technology (ESTIN) and University Abderrahmane Mira | Béjaïa, Algeria

- Mentored 100+ students in programming, algorithms, computer networks, web, and mobile development, and created practical lab materials.

EDUCATION

Master's Degree in Software Engineering | 2020 – 2022

University Abderrahmane Mira | Béjaïa, Algeria

Thesis: Progressive Web B2C e-commerce application. Built a full-stack platform using MongoDB, Express.js, React, and Node.js (MERN stack), including real-time inventory management, payment processing, and a responsive checkout flow.

Bachelor's Degree in Computer Science | 2017 – 2020

University Abderrahmane Mira | Béjaïa, Algeria

Projects: Inventory Management Software (Java); AI-powered game in desktop C++ and Android Studio using the Minimax algorithm. Active member of the Computer Science Club.

CERTIFICATIONS

Java Developer Certificate | Béjaïa, Algeria | January 2020 – March 2020

Huawei Certification in Cloud Computing | Béjaïa, Algeria

Languages: Kabyle (Native), Arabic (Fluent), English (Fluent), French (Fluent)
